Fire Baskets

A warm welcome

Nothing creates an inviting atmosphere quite like a Gazco fire. The centrepiece of any home, a Gazco fire adds warmth and character to a room or living space. And even if you don't have a chimney, there are electric versions with which you can still create a fireplace effect.

Whether you want to achieve an up-to-the-minute, contemporary look, or have your heart set on a more traditionally-designed fire basket, this brochure will help you make the perfect choice, whatever your style or budget.

Relax - it's a Gazco fire basket

When you choose Gazco, quality and technology are assured. From period styles to state-of-the-art designs, Gazco is committed to creating the ultimate in both solid fuel and flame-effect gas and electric fires.

Every model featured is handcrafted using traditional materials such as brass, steel, chrome and cast iron. Many are also offered in a choice of sizes and in a variety of casting shapes or finishes. In fact, there are almost 150 combinations from which to select the perfect fire basket for your fireplace.

Gazco is a BSI registered firm. Our rigorous quality control systems ensure that all our appliances comply with British safety standards as well as stringent European regulations. We also carry the independently assessed CE mark on all our gas fires.

What's your type?

Before you select your fire, your local Gazco retailer will need to make sure it's suitable for your home. Firstly, you need to know what fuel you will be using. Secondly, you will need to be aware of what type of chimney you have.

Fuels

Wood, coal and smokeless fuels

Most Gazco traditional fire baskets illustrated in this brochure are suitable for burning solid fuels such as logs and anthracite as well as approved smokeless fuels.

Gas

Most Gazco fire baskets can be specified for use with either Natural Gas or LPG. Natural Gas is provided through mains pipelines, whilst LPG is usually supplied to homes in rural areas from a tank in the garden or from gas bottles.

Electric

Many fire baskets are available with Gazco's "electric coal effect" and fan heater. These will require a 13amp socket located within 1 metre of your fireplace.

Chimney or no chimney?

To use a fire basket to burn solid fuels or install a gas version, your home will generally require a conventional brick or stone built chimney. These are easily recognisable, as the stack rises well above the roofline and is topped by a traditional chimney pot or, possibly, a gas terminal.

- 6 Check with your local Gazco dealer that your flue and fire opening are suitable for the fire of your choice.

Gas and Electric options

All baskets illustrated in this brochure are available with superb living flame gas fires and many can also be specified with Gazco's excellent electric fuel effect fires. The following are the choices from which you can select:

Gas fuel effects

Fires with gas logs (1), driftwood (2), coals (3) or glass (5) are available for natural gas and LPG but the pebble effect (4) is only available for natural gas. The glass effect is only offered as an option with the Aspen, Chamonix and Tahoe models. Please see page 25 for a full list of features.

If you are fitting a gas fire, you can also upgrade to Gazco's Command remote control system on all models except the Swan's Nest. It means that once the pilot has been ignited manually, the handset allows you to vary the flame height and heat output from the comfort of your armchair!

Electric fires

Electric fires (6) provide you with the comforts of a warming, flickering glow and a thermostatically controlled fan heater. They can be operated in three modes - glow only, glow + 1kW of heat and glow + 2kW of heat - and, in most cases, the fan heater can be discreetly hidden behind an optional ashpan cover when not in use.

Custom-built gas fires

If you have an existing grate or basket, and would like the extra convenience of a gas fire, then Gazco can provide you with a made-to-measure fire in a choice of log, driftwood, coal and pebble effects. Please see pages 24-25 for details.

1. Gas logs

2. Gas driftwood

3. Gas coals

4. Gas pebbles

5. Gas glass

6. Electric fire with coal-effect

Medium Chamonix with glass-effect gas fire

Contemporary fire baskets

Chamonix

There are two distinctive versions of the Chamonix. The first has a brushed stainless steel top and is available in two sizes. The Medium model in this series has less depth, thus allowing it to fit into a standard British 'constructional fireplace opening'. The second version features a top in grey glass and this model is available in the small size. All Chamonix models are offered complete with gas fires in a choice of log, driftwood, coal, pebble or glass effects.

Small Chamonix with smoked glass top and driftwood-effect gas fire

Medium Chamonix with stainless steel top and glass-effect gas fire

Tahoe

One size. Stainless steel/black steel construction. Complete with your choice of glass, log, driftwood, coal or pebble effect gas fire.

Tahoe with glass-effect gas fire
NB: slate frame not supplied by Gazco

Aspen

Available in two sizes. Stainless steel/black steel construction. Complete with your choice of glass, log, driftwood, coal or pebble effect gas fire.

Large Aspen with log-effect gas fire. NB: frame not supplied by Gazco

Davos

One size. Stainless steel/black steel construction. Complete with your choice of log, driftwood, coal or pebble effect gas fire.

Davos with pebble-effect gas fire

Davos with coal-effect gas fire

Davos with log effect gas fire, shown in Stovax Malmo surround
NB: steel frame not supplied by Gazco

Traditional fire baskets

Small Amhurst in black cast iron with log-effect gas fire, shown in Stovax Albany mantel and Stovax London front

Small Amhurst in polished cast iron with driftwood-effect gas fire

Amhurst

Available in two sizes. Straight front in choice of black cast iron or polished cast iron. Choice of all gas and electric fire options, except glass.

Large Art Deco in polished cast iron with coal-effect gas fire, shown in Stovax Art Deco mantel

Art Deco

Available in three sizes. Straight front in polished iron/steel only. Choice of all gas and electric fire options, except glass

Rochester

Available in two sizes. Straight front in choice of brass or polished iron/steel. Choice of all gas and electric fire options, except glass.

Small Art Deco with log-effect gas fire, shown in Stovax Albany mantel with Stovax London front

Ascot

Available in two sizes. Straight front in choice of brass or polished iron/steel. Choice of all gas and electric fire options, except glass.

Harlech

Available in two sizes. Straight front in choice of brass or polished iron/steel. Choice of all gas and electric fire options, except glass.

Orwell

Available in two sizes. Straight front in choice of brass or polished iron/steel. Choice of all gas and electric fire options, except glass.

Kennet with electric fire

Cromwell

Available in two sizes. Straight front in black cast iron only. Choice of all gas fire options, except glass.

Gas fires custom built for your fireplace

Gazco offers a comprehensive made-to-measure service for living flame gas fires. A wide range of sizes are available, there is virtually no limit on shape and all are supplied with Gazco's class-leading fuel effects. This makes them ideal for everything from a small Victorian cast iron fireplace in a bedroom to a large centrepiece in a pub or restaurant.

Gazco made-to-measure coal-effect fire in an original antique grate and fireplace

Features of all our superb gas fires include:

- Simple, multi-purpose manual control knob - for fingertip control of ignition, pilot light and gas supply.
- Upgradable to Command remote control system.
- Adjustable flame setting - infinitely variable between high and low to suit your mood.
- Piezo ignition - automatic sparking without batteries or mains electricity.
- Flame failure device - automatically shuts off the gas supply if the pilot light goes out.
- Oxygen sensitive safety pilot - automatically shuts off the gas supply if the oxygen level in your room falls below a safe level.
- Reduced Draught versions - no additional ventilation required.
- Natural gas or LPG - versions available for both types of gas.
- Heat outputs of around 2.5kW depending on model.

This log-effect fire is in a Devon restaurant. Gazco made-to-measure fires are suitable for domestic and commercial use. Please ask your retailer for further information about sizes, shapes and installation regulations.

Gazco made-to-measure log-effect fire at Langs Hotel, Glasgow

Log fuel effect

Driftwood fuel effect

Coal fuel effect

Pebble fuel effect

The minimum and maximum sizes for made-to-measure gas fires are as follows:

	Dimensions - with Manual Control							
	Coals		Pebbles		Logs		Driftwood	
	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum
Width (mm)	165	610	165	610	230	840	230	840
Depth (mm)	130	319	130	319	155	375	155	375

	Dimensions - with Manual Control upgradable to Command remote							
	Coals		Pebbles		Logs		Driftwood	
	Minimum*	Maximum	Minimum*	Maximum	Minimum*	Maximum	Minimum*	Maximum
Width (mm)	230	556	230	556	230	556	230	556
Depth (mm)	160	319	160	319	160	375	160	375

*Trays with these very minimum dimensions will be supplied without legs.

Note: The sizes above are given as a guide only and are subject to the actual shape required. There are strict regulations regarding the installation of all gas fires including custom-built models. In particular, some openings will require some form of canopy to be fitted in order to comply with BS5871 (Part 3). Your Gazco dealer will be able to advise you about sizes, shapes, regulations etc. and to answer any other questions you may have.

Additional information

Installation

The operation and appearance of gas fires depends on variable factors such as the standard of installation, performance of the flue and gas pressure supplied. Baskets that are supplied with a Gazco gas fire must be fitted by a qualified gas installer (CORGI registered in the UK), who should also verify the proposed site conditions are fully suitable for the product selected. Complete installation instructions can be obtained prior to purchase by downloading them from www.gazco.com.

Controls on gas fire versions

All gas fires except Amhurst, Art Deco, Cromwell, Plymouth, Pub Scene, Rochester, Stratford and Swan's Nest are supplied with controls on the right hand side. The Amhurst, Art Deco, Rochester and Stratford have the option of controls at the front. The Chatsworth, Cromwell, Plymouth and Pub Scene have controls at the front only. The Swan's Nest has 'extended controls' only.

Colours

Owing to variations in studio lighting and printing inks, the finishes/colour of fires illustrated in this brochure may differ slightly from actual models. Before purchasing, please ask your retailer to show you finish/colour samples.

Care and maintenance

Traditional materials, such as polished steel and brass, tarnish on contact with air, especially when also exposed to heat. To help minimise this effect, we recommend baskets receive regular treatment with Stovax Steel Cleaner and Stovax Brass & Copper Polish. Other surfaces can be maintained from time to time with Stovax Stainless Steel Cleaner and Stovax Traditional Black Grate Polish. Additionally, please remember that gas fires will require servicing annually by a CORGI registered engineer.

Product improvement

Gazco's policy is one of constant product improvement. Appliances may therefore sometimes differ from the descriptions or illustrations in this brochure.
