There can be little else more inviting and comforting than the warmth and glow of a real coal fire inside a traditional cast-iron fireplace.

The Industrial Revolution launched the robust, practical and stylish cast-iron fireplace and it still remains with us today.

The open coal fires of yesteryear, however, were often replaced over the last few decades by inefficient decorative gas coal effect fires. What options do we have in today's greener and more efficient market? Well, we would like to introduce you to the Integra Collection.

Integra is a unique range of quality cast-iron inserts which integrate fully with some of the most efficient gas, solid fuel and electric fires on the market today. These fires, known as Integra Engines, can be fitted into almost any flue application.

We hope you enjoy your journey through our brochure.

### Internet Policy

*We do not recommend purchasing an Integra fireplace online as it can be a complex product to order, deliver, assemble and install. Professional advice and experience are advisable as every fireplace and fitting is unique and is governed by regulation.*

*For this reason Cast Tec and its distributors only supply reputable outlets that display Integra products in a showroom, provide suitably qualified staff and use Gas Safe or HETAS registered fireplace installers.*

*To locate your nearest Retailer please use the contact details on the back cover.*

## What Integra options are available for Gas?

### Traditional Chimneys

For rooms with a traditional chimney (known as a class 1 flue) there is a deep **Convector Engine** (pages 4 & 14) with an amazing heat output of 4kW and an efficiency approaching 60%. This Engine is open fronted and available with a choice of manual or remote control and is also available in LPG.

If you can bare to sacrifice an open fire for our new glass fronted **High Efficiency (HE) Engine** (pages 3 & 11) you can achieve 4kW with an increased efficiency of over 80%.

### Pre-fabricated or Pre-cast Flues

For rooms with a flue but no traditional chimney breast there is a Classic Multiflue Engine (pages 7 & 22) with a heat output of 3.3kW and an efficiency approaching 50%. These flues often consist of a pre-cast fluepipe built inside the cavity of a wall and can often be seen from outside by a metal cowl or raised ridge tile on a roof instead of a traditional chimney pot.

### No Chimney Options

For rooms with no chimney or flue but a suitable external wall there is an open fronted fan-assisted **Powerflue Engine** (page 24) with a heat output of 3.3kW and an efficiency approaching 50%.

If you can sacrifice the open gas fire for our new glass fronted **Balanced Flue Engine** (page 16) you can achieve a quieter operation with an output of 4.3kW and an increased efficiency approaching 94%.

## What Integra options are available for Solid Fuel?

There is a **Solid Fuel Integra Suite** available in many of the Integra designs suitable for wood burning and smokeless fuels - see Pages 18 & 19.

## What Integra options are available for Electric?

There is an **Electric Integra Suite** available in many of the Integra designs - see Pages 20 & 21.

## Are the Mantels shown in the brochure available?

Yes, all mantels shown in the brochure are available from your Retailer (and are interchangeable). Standard mantel dimensions are shown on page 26 (but smaller sizes are often available).

Material options include Turkish Limestone, Italian Marble, Chinese Black Granite and timber such as Solid Oak and Pine.

### Anson Black HE

Cast	Anson Integra Black
Mantel	Chelsea Mocha Beige
Hearth	Granite 1448mm x 432mm (57" x 17")
Gas Fire	HE (High Efficiency) shown
Solid Fuel	Yes – see page 18
Electric	Yes – see page 20

## *Anson Integra*

Full Polish

The Anson Integra Full Polish has a contemporary feel about it with its stunning fully polished finish providing a splendid contrast to that of the Athena mantel shown here in black granite.

Cast	Anson Integra Full Polish
Mantel	Athena Black Granite
Hearth	Granite 1448mm x 432mm (57" x 17")
Gas Fire	Convector shown
Solid Fuel	Yes – see page 18
Electric	Yes – see page 20

# Ashbourne Integra

Polished

The Ashbourne Integra is a traditional decorative arched insert with the intricate detail shown in a highlight polish finish. An equally splendid but more discreet look is achieved using a matt black finish.

The Ashbourne is shown inside the Verona marble mantel in Italian Carrara (also available in black granite or Crema Marfil beige marble).

Cast	Ashbourne Integra Polished
Mantel	Verona Carrara Marble
Hearth	Granite 1448mm x 432mm (57" x 17")
Gas Fire	Convector shown
Solid Fuel	Yes – see page 18
Electric	Yes – see page 21

# Oxford Integra

Polished

The Oxford Integra is a typical art nouveau period casting shown here in a highly polished finish (also available in matt black).

The tulip design on the canopy compliments the Liberty tile set displayed in ivory and burgundy.

The Oxford is shown inside the Limerick cast-iron mantel in a highlight polished finish sitting on a black granite hearth.

Cast	Oxford Integra Polished
Mantel	Limerick Cast Iron
Tiles	Liberty (Ivory/Burgundy)
Hearth	Granite 1448mm x 432mm (57" x 17")
Gas Fire	Convactor shown
Solid Fuel	Yes - see page 19

# Washington Integra

Polished

The Washington Integra is a simple square design as opposed to the usual arched design. The casting is shown in a polished finish and is also available in matt black.

The York mantel is suitable for smaller chimney breasts and is shown here in beige Crema Marfil pure marble sitting on a black granite hearth.

Cast	Washington Integra Polished
Mantel	York Crema Marfil
Hearth	Granite 1372mm x 381mm (54" x 15")
Gas Fire	Classic Multiflue shown

# Anson Integra

Matt Black

The Anson Integra is a simple arched insert shown here in an understated matt black finish.

The simplicity of the casting compliments the bold corbels of the Traditions solid oak Richmond mantel in a period finish (antiqued pine also available).

Cast	Anson Integra Black
Mantel	Richmond Solid Oak
Hearth	Granite 1372mm x 381mm (54" x 15")
Gas Fire	Convector shown
Solid Fuel	Yes – see page 18
Electric	Yes – see page 20

# Jesmond Integra

Full Polish

The Jesmond Integra is shown in full polish with a set of Art Deco sleeves giving a very contemporary look. A more subtle look can be obtained in matt black and the sleeves can be replaced by tiles to add some colour.

The mantel shown is the Mayfair in Mocha Beige marble and is also available in Crema Marfil, Carrara, Limestone and Black Granite.

The Jesmond Integra is also available with a decorative floral canopy and becomes the Roma Integra.

Cast	Jesmond Integra Full Polish
Mantel	Mayfair Mocha Beige
Sleeves	Art Deco Full Polish
Hearth	Granite 1448mm x 432mm (57" x 17")
Gas Fire	Convector shown

## *Anson Integra*

Half Polish

The Anson Integra Half Polish is an elegant arched insert with a matt black outer band contrasting with a highly polished interior.

The casting looks quite exquisite with the rather grand Durham mantel in beige Crema Marfil pure marble. The base is a simple black granite hearth.

Cast	Anson Integra Half Polish
Mantel	Durham Crema Marfil
Hearth	Granite 1448mm x 432mm (57" x 17")
Gas Fire	Convector shown
Solid Fuel	Yes – see page 18
Electric	Yes – see page 20

## *Majestic Integra*

Polished

The Majestic Integra is a plain matt black insert with a simple polished arched band giving a more discreet and minimalist feel.

This casting is shown inside the Flat Victorian Mantel in Turkish Limestone (but also available in Black Granite or Carrara Pure Marble).

The glass fronted HE (High Efficiency) Engine boasts an impressive output of 4kW with a gross efficiency of 80%.

Cast	Majestic Integra Polished
Mantel	Flat Victorian Limestone
Hearth	Granite 1372mm x 381mm (54" x 15")
Gas Fire	HE (High Efficiency) shown
Solid Fuel	Yes – see page 18
Electric	Yes – see page 20

# Majestic Integra Combination

Polished

The Majestic Combination is a complete cast-iron fireplace with shelf attached making it ideal to suit the smaller chimney breast.

Whilst maintaining its traditional elegance, the simple design gives this cast a rather contemporary feel and it would not be out of place in the most modern of homes.

The casting is designed to fit flat against a wall with only the gas appliance protruding into the standard fireplace opening therefore making it very easy to fit.

Cast	Majestic Combination Polished
Hearth	Granite 1067mm x 381mm (42" x 15")
Gas Fire	Convector shown
Solid Fuel	Pending
Electric	Pending

# Ashbourne Integra Combination

Polished

The Ashbourne Combination is similar in size and function to the Majestic Combination but portrays a traditional decorative design on the arches and canopy. This makes the casting look more authentic whilst maintaining its ability to integrate with the most efficient gas fires available.

The Ashbourne is shown in a highlight polished finish but is also available in an antique graphite or matt black finish.

Cast	Ashbourne Combination Polished
Hearth	Granite 1067mm x 381mm (42" x 15")
Gas Fire	Convector shown
Solid Fuel	Pending
Electric	Pending

# *Glen Integra*

Matt Black

The Glen Integra is a traditional Victorian design. Shown in matt black the Glen is also available in an antique or highlight polished finish.

The handpainted tubeline tiles depict a burgundy coloured tulip (other colours and designs are available on p17).

The Traditions Kielder mantel displays several beautiful mouldings and is shown here in solid oak (also available in solid pine).

Cast	Glen Integra Black
Mantel	Kielder Solid Oak
Tiles	Tulip (Ivory/Burgundy)
Hearth	Granite 1372mm x 381mm (54" x 15")
Gas Fire	Convector shown

# Aston Integra

Antique

The Aston Integra is another traditional design looking very elegant in an antique finish very similar to the old fashioned black lead but these days graphite is used.

The Aston is also available in a matt black or highlight polished finish.

The handpainted tubeline tiles depict a blue iris flower (other colours and designs are available on p17).

The mantel shown is the Balmoral in solid pine (with an antique finish) and this mantel is also available in solid oak.

Cast	Aston Integra Antique
Mantel	Balmoral Solid Pine
Tiles	Oriental Iris (Ivory/Blue)
Hearth	Granite 1372mm x 381mm (54" x 15")
Gas Fire	Convector shown

# Eden Integra

Matt Black

The Eden Integra may look very traditional in a matt black finish furnished with beautiful Oriental Iris tiles in ivory & burgundy.

This fireplace, however, in common with all the other Integra castings in this brochure can be fitted into a room with no chimney or flue.

The **Integra Balanced Flue** gas fire (shown in the picture), boasts an output of 4.3kW and an extraordinary efficiency of 94%.

Those living in a new or converted property should no longer need to sacrifice their choice of a traditional cast-iron fireplace due to inefficiency or the lack of a chimney.

The Eden is shown with the Traditions Sherwood solid oak mantel which is also available in solid pine.

Cast	Eden Integra Black
Mantel	Sherwood Solid Oak
Tiles	Oriental Iris (Ivory/Burgundy)
Hearth	Granite 1372mm x 381mm (54" x 15")
Gas Fire	Balanced Flue shown

# Hand Painted Tubeline Tiles & Cast-Iron Sleeves

**Tubeline Tiles** were traditionally made to withstand the high temperatures generated by a working fireplace and performed the practical function of reflecting heat into the room when placed at an angle facing inward. With a choice of five designs and various colour options, two runs of five tiles make up a set to fit

into an Integra casting. The Lucia and Mediterranean Poppy tile sets include a left and right handed design. Our tubeline tiles are individually handpainted in the traditional way and will be subject to colour variation and normal crazing.

**Cast-iron Sleeves** are an alternative to the more colourful tubeline tiles. Sleeves are supplied in pairs to suit an Integra casting and these are available in a matt black, antique or highlight polished finish. The Art Deco Sleeve design, as shown on page 9, is also available in Full Polish.

# Cast Iron Care

## Packaging

Your Integra cast-iron fireplace is packaged so as to minimise exposure to adverse elements and should reach you in perfect condition. The product should be stored in a warm, dry environment and remain packaged until the fireplace is ready to be installed. This will prevent accidental damage being caused, which will not be covered under warranty. It is essential that you inspect your Integra casting prior to installation as it will be deemed to be of merchantable quality thereafter and no liability will be accepted for product removal, reinstallation or redecoration.

## Cleaning

Your Integra casting requires only the minimum upkeep and it should remain in superb condition for many years. Matt black, antique or polished finishes can be maintained simply by dusting with a dedicated dry paint brush.

## Warning

Cast-iron products are vulnerable to rust and tarnishing if exposed to dampness or water. Avoid the use of damp cloths, water-based liquids, furniture polish, detergents, oils, grease etc. onto the surface of the cast-iron. Should your fireplace become wet for any reason, dab it gently with a simple dry cloth. This should prevent any tarnishing or rust from forming. It is normal for some discoloration to occur to the working parts of a cast-iron fireplace.

## Important Information

Products shown in this brochure are manufactured for Cast Tec Ltd., who, with a professional group of companies, distribute them exclusively in the U.K.

Goods must be checked prior to installation, as no responsibility will be accepted thereafter for the redecoration, removal or reinstallation of products.

Faulted goods must be reported within 48 hours.

Installation should be carried out by a professional Gas Safe or HETAS Registered fireplace fitter. No responsibility will be accepted for damage or problems arising from an incorrect or unqualified installation.

Integra is a registered trademark and the Integra Split Fascia Concept is patented. Integra Engines are CE approved and manufactured specifically to suit the Integra Casting.

No responsibility will be accepted for problems arising where a gas or electric appliance has been used which is not approved or suitable to fit into the Integra Casting or where the fitting has taken place without the relevant instructions.

Cast Tec Ltd., reserve the right to delay or withdraw products, change designs, specifications or materials without prior notice due to continuous product development or supply problems.

Photographs and designs shown in this brochure are the copyright and design rights of Cast Tec Ltd. and can only be used or copied with permission.

# Solid Fuel Integra

Majestic

The Majestic SF Integra is a typical arched cast-iron insert adapted for use with a highly efficient stove box called the Solid Fuel Inset (shown below).

Solid Fuel Integra's are suitable for wood burning and smokeless fuels and boast outputs up to 5kW and efficiency levels approaching 78%.

The Majestic, shown inside the Edwardian Corbel mantel in Turkish Limestone, is also available as the Anson or traditional Ashbourne arched design.

**Solid Fuel Inset**

*\*NOTE: Hearths fitted for solid fuel may have specific requirements to allow for expansion. Seek appropriate advice.*

Cast	Majestic SF Integra
Mantel	Edwardian Corbel Limestone
*Hearth	Granite 1448mm x 457mm (57" x 18")
Solid Fuel	SF Inset as shown

# Solid Fuel Integra

Oxford

The Oxford SF integrates a traditional tiled cast-iron insert with the highly efficient glass fronted Solid Fuel Inset (shown previous page).

Available highlight polished, matt black (shown) or with an antique graphite finish, the Oxford is shown inside the Victorian Corbel mantel in Turkish Limestone and sits upon a beautiful matt black Ciara Slate porcelain tiled hearth which is ideally suited to the rigors of solid fuel.

The Solid Fuel Inset, suitable for wood burning and smokeless fuels, boasts outputs up to 5kW and efficiency levels approaching 78%. There is a Primary Airwash system located below the canopy of the casting which helps to keep the window clean and there is a Secondary Air Regulator which can be adjusted by moving the knob on the firefront door left or right. The door simply clips open or closed with an operating tool.

A hollow in the Integra Outer Fascia (see Assembly page 26) allows access to connect a flue liner (for maximum efficiency and safety) to the spigot or flue outlet.

Cast	Oxford SF Integra
Mantel	Victorian Corbel Limestone
Hearth	Granite 1448mm x 457mm (57" x 18")
Solid Fuel	SF Inset as shown

# Electric Integra

Anson Full Polish

The Anson Electric is shown fully polished giving a beautiful contemporary feel but is also available in Half Polish, Matt Black and Majestic finishes. The mantel shown is the Durham in stunning Black Granite.

The standard Electric Integra Inset comes with a remote controlled 2kW fan assisted heater (fan is behind canopy) with a realistic flame effect but this can be upgraded to the Integra LCD on page 21 for those wanting more than just a flame effect.

*Realistic flame effect*

## EASY TO FIT

The Electric Integra is a flat wall fixing which allows it to be fitted to any wall without the need to break into the plaster or brickwork (using a standard 76mm (3") rebated mantel).

Cast	Anson Electric Integra Full Polish
Mantel	Durham Black Granite
Hearth	Granite 1448mm x 432mm (57" x 17")
Electric	Electric Inset shown

# *Electric Integra LCD*

Ashbourne Antique

The Ashbourne Electric is shown here in an antique finish creating a nice contrast with the Georgian Roundel mantel in Carrara Italian Marble. Shown with a Ciara Slate matt black tiled hearth the Ashbourne is also available in a highlight polish or matt black finish.

The Electric Integra LCD inset shown is a state of the art electric fire which not only produces a stunning deep flame effect but all the other noise effects and settings you could ever imagine at the touch of a remote control. This fire is not only realistic and easy to use but can be truly mood changing! The Integra LCD fits all the Electric Integra castings.

Cast	Ashbourne Electric Integra Antique
Mantel	Georgian Roundel Carrara Marble
Hearth	Tiled Ciara Slate 1460mm x 438mm (57"x17")
Electric	Integra LCD shown

# Gas Fires with Trims & Frets

## *Multiflue*

The Classic Multiflue is a simple yet effective coal effect fire being designed to fit almost any chimney or flue-type. Its cosy flame picture and 3.3kW output make it a welcome edition to any living room.

Shown here with a chrome trim and Media fret in black & chrome, the Classic Multiflue is also available in a brass or black finish with a choice of fret.

The Traditions solid oak Grizedale mantel in a period finish looks elegant against the contrast of the black granite hearth set and chrome embellishments of the gas fire.

Mantel	Grizedale Oak
Back panel	Granite 940mm x 940mm (37" x 37")
Hearth	Granite 1372mm x 381mm (54" x 15")
Trim	Chrome
Fret	Media - Black & Chrome
Gas Fire	Classic Multiflue

# Gas Fires with Trims & Frets

## *Convector*

The Integra Convector stands alone in the convector market with its impressive 4kW output delivering the warmth and efficiency you would expect.

Suitable for traditional chimneys with its extra depth the Integra Convector has an impressive flame picture and is available in either a manual or hand held remote control.

Shown here with a black trim and Bauhaus fret in black, the Integra Convector is also available with a brass or chrome trim and a choice of fret.

The Traditions solid oak Rothbury mantel in a period finish gives a rather minimalist and understated look when combined with the highly polished cast-iron of the Hilton fascia shown here in a Half Polish finish.

The Hilton fascia is also available in a Full Polish, Matt Black or Polished moulding only version.

Cast	Hilton Half Polish
Mantel	Rothbury Oak
Hearth	Granite 1372mm x 381mm (54" x 15")
Trim	Black
Fret	Bauhaus - Black
Gas Fire	Integra Convector (NG & LPG option)

# Gas Fires with Trims & Frets

## *Powerflue*

The Integra Powerflue has been designed specifically for homes without a chimney or flue.

A fan operated flue system allows the 3.3kW output gas fire with its realistic flame picture to be fitted to a suitable external wall.

Shown here with a brass trim and brass New Wave fret, the Integra Powerflue is also available with a chrome or black trim and a choice of fret.

The Traditions solid oak Corinth mantel in a period finish has a splendid curved inner moulding complimenting the unusual curve of the black granite hearth.

A new **Integra Balanced Flue** gas fire shown on page 16 boasts a higher output and efficiency than the Powerflue due to its glass fronted design.

Mantel	Corinth Solid Oak
Back panel	Granite 37" x 37"
Hearth	Granite Half Moon 1372mm x 381mm (54" x 15")
Trim	Brass
Fret	New Wave - Brass
Gas Fire	Integra Powerflue

# Gas Fires with Trims & Frets

## *High Efficiency*

The HE (High Efficiency) is an attractive gas fire which, similar to the convector, benefits from a substantial 4kW output, but unlike the convector, the HE is glass fronted, and this difference increases the efficiency from 60% to over 80% and in effect gives you more heat for less cost.

Shown here with a black trim and Bauhaus fret in black, the Integra HE is also available with a brass or chrome trim and a choice of fret.

The HE is shown inside a fully polished Hilton fascia casting which contrasts pleasantly with the dense black granite of the Flat Victorian mantel.

The Hilton fascia is also available in Half Polish (p23), Matt Black or with the Moulding Polished only and the Flat Victorian mantel is also available in Italian Carrara marble or Turkish Limestone.

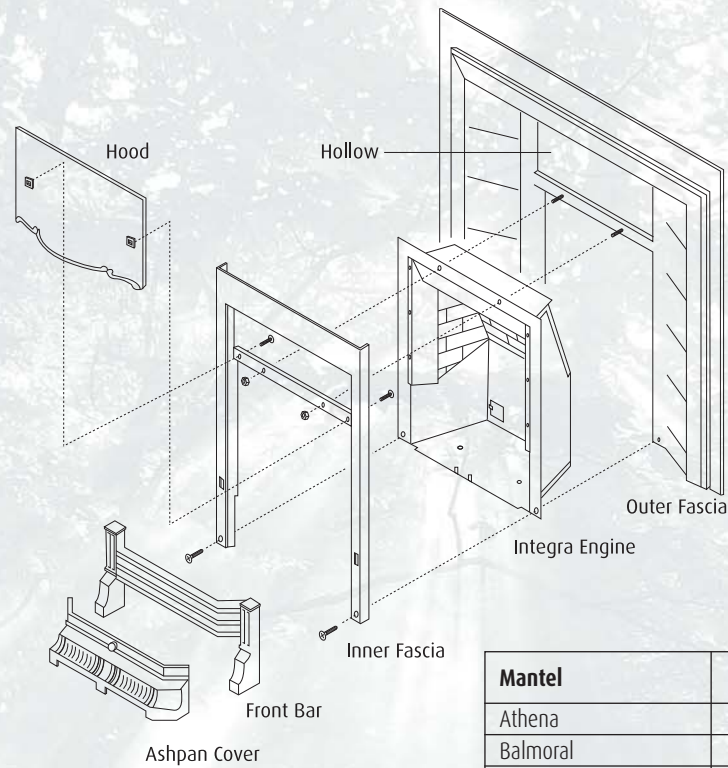

Cast	Hilton Full Polish
Mantel	Flat Victorian Black Granite
Hearth	Granite 1372mm x 381mm (54" x 15")
Trim	Black
Fret	Bauhaus - Black
Gas Fire	Integra HE (High Efficiency)

## Cast Assembly Details

## Easy to fit

The Integra casting can be comfortably housed inside a standard 76mm (3") rebated mantel which alleviates the need for a fitter to knock into the plasterwork or brickwork of a wall.

In addition, the Integra Engine can be serviced or even replaced simply by removing the inner fascia.

## Cast & Mantel Dimensions

**A:** width. **B:** height. **C & D:** minimum fire surround aperture required.
