Rossano, shown in Manila Micro Marble and featuring the Mayfair Chrome Gas Fire - see page 56

Marble Collection

Understated Elegance

Of all the materials to make a fireplace from, micro marble must surely be one of the most luxurious and beautiful.

Be Modern micro marble is hand selected and hand finished to the very highest of standards.

Design and proportion merge seamlessly with finely polished surfaces and details, the ultimate adornment for a luxury home.

Micro Marble is the opulent effect of marble captured for your home. It is made from small pieces of real marble finely crushed and bonded together.

Stone Collection

Simply Stunning

Be Modern's stone effect fireplaces combine solid good looks, perfect proportions and permanence.

This earthiness is the secret of a stone effect fireplace with its tactile textures and beautiful neutral tones to perfectly suit today's contemporary interior fashion styles.

We have 2 varieties of stone for you to choose from. Our new White Stone range takes the fireplace forward into the 21st century. With it's softer, more refined texture, this lighter stone has been processed, removing inclusions that could otherwise spoil the look of your fireplace.

Our Smooth Stone range has been developed to give you an incredibly smooth finish and is available in two finishes: Dover and Cotswold. So, if you are feeling classically modern and want a fireplace without unsightly veining and inclusions, choose a Be Modern stone effect fireplace.

Smooth Stone models require a separate Back Panel and Hearth in Micro Marble or Granite.

The Be Modern Guide...

...to choosing that perfect fire

Once you have selected your new stunning fireplace you will need to choose a fire to suit your requirements. Be Modern produces a range of quality gas and electric fires to suit your home and fit in with your chosen fireplace style.

Here is a step by step guide to ensure you have years of pleasure from your fire and fireplace. Our fires section lays out clearly our range of fires and the relevant technical information to suit in an easy to use reference table.

There are 3 important considerations when choosing a Be Modern fire:

- The type of flue or chimney in your home
- Your choice of either a gas or electric fire or electric suite
- The type of fuel bed and style of trim and fret you prefer

a) Types of Flue or Chimney Requirements

Brick built chimneys

Brick built chimneys can be identified by a brick built chimney stack and by chimney pots. Brick built chimneys give you the widest choice of fires and can accommodate gas fires with full depth fire chambers as well as most electric fires.

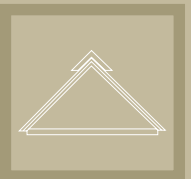

Pre fabricated flues

These can be identified by an external metal flue pipe or cowl on the roof and may have a false chimney breast in the room to conceal the metal flue in the home. Pre fabricated flues can accommodate some multiflue fires, slimline fires and electric fires.

Pre cast flues

Check for a ridge tile vent or a metal flue pipe with cowl. Pre cast flues are built into cavity walls and can accommodate slimline, some multi flue gas fires and electric fires.

No Chimney or Flue options

If you have no chimney or flue, you can still enjoy the benefits of a warm glowing fire.

Here are 3 options below:

- Powerflue fires

If you want an open fronted gas fire and have no flue or chimney, then a Powerflue fire could be the option for you. This system has a fan assisted exhaust that draws and vents the fire through an external wall. Look out for this symbol throughout the next few pages.

- Flueless gas fires

No chimney or flue required but correctly sized room and ventilation requirements should be adhered to. See pages 60-61.

- Electric fires and suites

See our full range of electric fires and suites on pages 62-71.

b) Gas or Electric Fires or Electric Suites

Now you have established your flue arrangements you need to choose between a gas fire or an electric fire.

Gas Fires

- Gas fires provide real flames, fantastic ambience, instant heat and great controllability
- Choose from coal, pebble or driftwood
- You can choose a conventional gas fire for chimneys and flues, or a flueless gas fire if your room does not have a suitable flue or chimney
- You will need a supply of natural gas to the fire and they must be fitted by a Corgi registered Installer.

Gas Fires - see pages 54 to 61

Electric Fires

- Electric fires provide a realistic flame effect and ambience with or without heat
- You do not need a chimney or flue
- Our standard electric fires provide instant controllable heat with 2 settings: 1kW and 2kW all with easy to use controls and thermostat
- Our 700W Dante Wall Mounted fires are easily mounted to any flat wall.

Electric Fires - see pages 62 to 69

Electric Suites

- All the benefits of an electric fire but built into a bespoke designed fireplace suite
- Flat wall fitting - no chimney or flue required
- The instant fire and fireplace, fantastic value packages, just fix and position safely, plug in and it's ready to enjoy.

Electric Suites - see pages 70 to 71

c) Type of Fuel Bed and Trim Style

Be Modern has a wide range of trims and fuel beds to suit all styles:

Our Gas fire fuel beds are ultra realistic with fine attention to detail during our precision manufacturing processes.

Our fire trims and frets come in a wider variety of choice from brass or chrome right through to granite and limestone. Something for everyone.

For further information on trim and fret options, please refer to the technical information tables on pages 72-73.

Pebble Effect Gas Fire

Coal Effect Gas Fire

Driftwood Effect Gas Fire

Welcome to our range of Gas Fires.

Once you have chosen your new fireplace, give it a warm glowing heart with an open-fronted Be Modern gas fire.

Our gas fires come in a range of finish options, some with optional fuel bed choices, but all carry the Be Modern guarantee to be perfectly compatible with our fireplaces.

For full details on each of our fires including dimensions, heat outputs and features, please refer to the technical specifications on pages 72-73.

We know your fire will sit in the heart of your fireplace and we're sure we've got the perfect style with the right features exactly for you.

Total Control

All Be Modern fires are easy to control. Our top of the range Elite models feature our electronic push button top control, allowing you to light and operate the fire with simple fingertip ease. Our Bravo and Encore range also have a remote control option for the ultimate in relaxation and comfort.

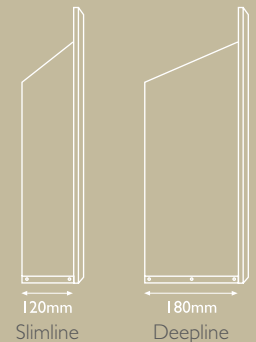

Look out for these symbols over the next few pages.

Rotary Control	Remote Control	Electronic Push Button Top Control
Pilot and Flame controls concealed behind fret cover	Control your fire in comfort	Pilot and Flame controls operated by easy to operate push buttons on top side of fire (Elite models only)
		 

Slimline or Deepline

Be Modern fires have a selection of slimline fires (120mm deep) making them perfect for fitting in chimney breasts, pre-cast or pre-fabricated flues.

Our standard deepline fires (180mm deep) are ideal for all standard brick built chimneys.

Be Stylish

Be Modern have a selection of different models that provide the option of a stylish pebble effect fuel bed, instead of the traditional coal bed.

Our fires are also available in a range of trim and fret colours to suit your individual surround and style.

Be Safe

Be Modern are committed to your safety. All our fires are safety tested and CE approved. In addition all our Gas Fires are equipped with an oxygen depletion sensor that automatically cuts-out the flame if the flue becomes blocked.

CAUTION

Be Modern always recommend that all gas appliances should be installed and regularly serviced by a CORGI registered engineer to ensure safe operation and optimum performance. Certain parts of the fire will be hot. A suitable guard is recommended where young children or infirm are concerned.

All of Be Modern's Gas Fires are available as either Slimline or Deepline, making them ideal for all flue and chimney types. Selected models have Powerflue and Electronic push button top control options.

Shown in Black

Abbey

frame in a Pearl Stone
finish. Shown on the right,
this micro marble frame
really captures the
hole-in-the-wall appeal and
completes the picture.

For full technical details including heat outputs and dimensions see pages 72-73.

100% Efficient Flueless Gas Fires.

Now you can enjoy the warmth of real flames, even if you do not have a flue or chimney.

Flueless fires are the perfect hang on the wall, no chimney solution to instant warmth.

The technology provides a very flexible solution for your house or apartment, allowing you to install a fire not only in the living room, but also the dining room, office, study or kitchen.

All you need to enjoy these hang on the wall gas fires is a natural gas supply, the required minimum room size and adequate ventilation.

Ensuring adequate ventilation in the room

Check to see if an air brick / air vent is located in your room. Many new homes will already have one fitted. If your room does not have an air vent fitted that is a minimum of 100cm² vented directly to the outside, then one will need to be installed.

Safety

All our flueless fires incorporate a Flame Failure Device that cuts off the gas supply to the fire if oxygen levels in room fall below a specific level.

The benefits of a Be Modern Flueless Fire:

- No chimney or flue required
- 100% efficient, reducing fuel costs
- Simply hang on the wall
- No recess or hearth required

Please note: Do not recess flueless fires into any wall or chimney

www.bemodern.com

Firenza Flueless Gas Fire shown in Natural White Marble.

Firenza

- Portrait style flueless fire
- Minimum room size 23m³
- 2kW heat output

Be Modern Electric Fires.

Efficient, instant controllable heat, low energy bulbs and thermostat control options.

Be Modern electric fires instantly transform your home with a minimal disruption to your lifestyle.

They convert virtually all of the electricity entering the fire into heat and light emanating into the room and unlike gas fires they do not waste heat up the chimney or flue.

Take a look through our Electric Fires section and you will see examples of our **Wall Mounted Electric Fires**, which simply hang on the wall for an instant contemporary transformation, our **Standard Electric Fires**, for use with Be Modern Fireplaces and our **Electric Suite Packages**, which include the featured electric fire, fireplace, back panel and hearth all in one easy to install package.

Simple controllability

Our standard electric fires give you an easy choice of either 1kW or 2kW heat output. They are also fitted with thermostat control which help to maintain a greater degree of room comfort and reduce energy costs too!

Our Dante wall mounted electric fires are designed for efficient background heating and have a very low energy consumption of 700W.

Lower power consumption for today's energy conscious consumer

All Be Modern standard electric fires have been designed to use long-life low energy bulbs to reduce energy consumption. They can easily be used without the need to turn on the heater elements allowing you to enjoy the glowing warmth of a fire without having to add additional heating to your room. Perfect for use during those warm summer evenings.

Electric Fire

Remote Control

Flame only setting

Features:

Realistic Flame Effects

As well as providing that all-important warmth, our electric fires have a very realistic flame effect. This can be operated independently of the heat giving you that warm glow without having to turn on the heat! Perfect for warmer nights.

More Choice

Be Modern have an extensive choice of electric fires plus options of trim colours and fret styles to suit any home décor and interior.

Ease of Use

All Be Modern electric fires are easy to operate and control. Some models even feature remote control operation so you can enjoy total control and relaxation from the comfort of your armchair.

Flexible Installation

Be Modern electric fires and suites can be easily installed almost anywhere. Installation is simple with minimal disruption to your home. With no flue or chimney required they can be fitted in virtually any room including dining rooms studies or even bedrooms.

Easy Fit Spacer Frames

If you do not wish to recess your fire, most electric fires are supplied with spacer frames for flat wall installation. Our frames can be adapted to suit a variety of rebated surrounds and applications - please see page 66 for full details.

Maintenance Free

Following installation via a correctly fused spur by a competent person, our electric fires do not require annual servicing or regular maintenance unlike gas fires.

For full technical details including heat outputs and dimensions see pages 72-73.

Dante

Dante

A beautiful range of wall mounted electric fires from Be Modern

The Dante brings a whole new variety and extended choice of electric fires to your living space.

With a selection of styles from our elegant and modern curved glass fascia to the refined and traditional limestone model, you will discover the perfect finish to suit your room.

- Impressive real flame effect – with flame effect only setting
- Easy to install - fixes direct to flat walls, no chimney or flue required
- 700W heat output
- Decorative white stone fuel bed
- Easy to use side controls or remote control operation
- Choice of fascia designs to suit your room style

Brushed Steel

Clean, elegant lines with a modern style give this brushed steel fascia complete urban sophistication

For full technical details including heat outputs and dimensions see page 73.

Black Granite

Perfectly suited to match kitchen worktops and floors, black granite has a tough, natural and classic appearance.

Natural White Marble

Nothing quite matches the beauty of natural marble and this white marble fascia is no exception.

Curved Black Glass

Stunningly attractive from all angles, the curved glass front adds focus to any living space.

Flat Black Glass

With its reflective, modern look the glass fascia looks elegant in most room types.

Limestone

With its soft and pure looks, natural limestone has an everlasting appeal and brings style and class to any living space.

Standard Electric Fires.

Be Modern have a range of electric fires with a selection of designs and styles to suit your fireplace and interior scheme.

For complete peace of mind, our range of electric fires have a choice of fixing options to suit your installation. From recess fixing into a chimney breast to flat 'against the wall' fixing, we have the right fire and surround for you.

Spacer Frames - A choice of fixing options.

Fully Recessed

- Fire is fully recessed into standard chimney breast or false wall
- Flush fit – fire is installed without need for spacer frames
- Suitable for all Be Modern Standard Electric Fires

Semi Recessed

- Fire is semi-recessed into chimney breast
- Ideal for narrow chimneys where fire can't be fully recessed
- Single spacer frame (45mm) is fitted behind the trim

Flat Wall Fix

- Allows fire to be surface mounted against any flat wall
- No need for chimney breast or wall opening
- Twin spacer frames (90mm) fitted behind the trim

Note: Spacer frames are supplied complete with all our standard electric fires except the Abbey, Detroit and Sensation

Deep Trim Fires

- Fitted with an attractive 30mm deep trim, this exclusive range of fires can be installed into any deep rebated surround (75mm) providing a true flat wall installation
- Removing the need for a surface mounted spacer frame, any marble or timber surround with a 75mm rebate can be selected from our extensive range and can be installed against a flat wall
- Black, Brass and Chrome options with Camberley and Lexus fires
- Brass and Chrome options with Mayfair fire

Specialist Retailer

Be Modern Group hold design copyright and registration of design for its product ranges. Be Modern Group are continually striving to improve and develop their range of products. It is important, therefore, to check details before ordering as sizes and specifications may change without prior notice. Whilst every effort is made to ensure accuracy and colour, it is not always possible to obtain perfect reproduction because of the materials and printing processes used and you may find that shades, natural grain markings and marble colouring are not consistent. Be Modern Group do not advise the placing of articles that are extremely hot or liable to stain on their fireplaces. There is a technical specification available; for further information, please apply to the Be Modern Group.
