# Marble Collection

Our latest marble range offers nineteen exquisite designs in a variety of natural and micro marble finishes. Each design has been carefully crafted to ensure your fireplace is finished to the highest standard.

With unique style and individuality, Natural White marble demonstrates the beauty of natural veining and subtle markings, meaning no product is identical.

Our stunning range of micro marble finishes are made from small pieces of real marble finely crushed and bonded together. With a consistent pattern and a guaranteed smooth, high quality finish, these are perfect alternatives to Natural White marble.

## INTRODUCING SMARTSENSE LIGHTING

Our most popular marble designs are now available with under-mantel Smartsense lighting. Manufactured with long life LEDs which are mercury free and more energy efficient than traditional halogen bulbs; they provide a sharp flicker-free light accentuating the natural beauty of the marble.

The LEDs incorporate Smartsense Technology which are controlled by a motion sensor – no contact is required! Look for the Smartsense symbol throughout the brochure.

## LEONA

The perfectly balanced and strikingly simple Leona surround is ideal for more compact interiors.

Leona, features the Be Modern Sensation Chrome gas fire.

## OTHELLO

A combination of delightful lines and sensational steps creates an Othello surround that boasts natural beauty and a real sense of timeless charm. The perfect finish to any room!

Othello, features the Be Modern Sensation Chrome gas fire.

## PORTO

Crisp edging and clean straight lines make this a compact and versatile fireplace for both modern and contemporary settings.

Porto, features the Be Modern Sensation Chrome gas fire.

## TORINO

Intricate detailing and neatly bevelled lines compose a Torino surround that oozes style and quality. With distinctive characteristics and individual style, look no further for a centrepiece that effortlessly transforms your room.

Torino, features the Be Modern Sensation Chrome gas fire.

# Fire Collection

Once you have selected your stunning new fireplace you will need to choose a fire that meets your requirements. Be Modern produces an extensive range of quality gas and electric fires to suit your home and match your chosen fireplace style.

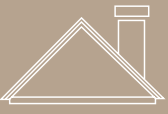

The following pages explain and illustrate our range of fires, including key technical details.

## There are 3 important considerations when choosing a Be Modern fire:

- 1) The type of flue or chimney in your home
- 2) Your choice of a gas or electric fire
- 3) The type of fuel bed and style of trim and fret you prefer

### 1) Types of Flue or Chimney Requirements

	<p><b>Brick built chimneys</b> Brick built chimneys can be identified by a brick built chimney stack and by chimney pots. Brick built chimneys give you the widest choice of fires and can accommodate all of our gas and electric fires.</p>
	<p><b>Pre fabricated flues</b> These can be identified by an external metal flue pipe or cowl on the roof and may have a false chimney breast in the room to conceal the metal flue in the home. Pre fabricated flues can accommodate slimline gas fires and electric fires.</p>
	<p><b>Pre cast flues</b> Check for a ridge tile vent or a metal flue pipe with cowl. Pre cast flues are built into cavity walls and can accommodate slimline gas fires and electric fires.</p>
	<p><b>No Chimney or Flue options</b> If you have no chimney or flue, you can still enjoy the benefits of a warm glowing fire. There are 2 options:</p> <p><b>Powerflue fires</b> If you want an open fronted gas fire and have no flue or chimney, then our Powerflue models are for you! This system has a fan assisted exhaust that draws and vents the fire through an external wall.</p> <p><b>Electric fires</b> See our full range of LED electric fires and suites on pages 27-28.</p>

## 2) Gas or Electric Fire

### Gas Fires

Page 25-26

#### Gas Fires

- Gas fires provide real flames, fantastic ambience, instant heat and great controllability
- Choose from coal or pebble bed
- You will need a supply of natural gas to the fire and they must be fitted by a Gas Safe Registered engineer

### Electric Fires

Page 27-28

#### Electric Fires

- Electric fires provide a realistic LED flame effect and ambience with or without heat
- You do not need a chimney or flue
- Our standard electric fires provide instant controllable heat with 2 settings: 1 & 2kW all with easy to use controls and thermostat
- All our electric fires are 100% efficient at point of use

## 3) Choice of Fuel Bed & Trim Style

Be Modern offer a wide range of trims and fuel beds to suit all styles.

Our fire trims and frets come in a variety of choices including Black, Brass, Chrome & Part or Fully polished and our fire fuel beds are ultra realistic with fine attention to detail during our precision manufacturing processes.

#### Fuel Beds

Coal gas fire

Pebble gas fire

Coal effect electric fire

## LED Electric Fires

Be Modern have a new range of LED electric fires with a selection of designs and styles to suit your fireplace and interior scheme. For complete peace of mind, our range have a choice of fixing options to suit your installation.

### LED Flame Technology

LED technology offers a range of benefits:

#### Energy Efficiency

- Running the flame effect only costs less than £2 per year (assuming 5hrs/7days per week usage. NPower Standard electricity tariff for NE33 5QZ, 05/01/2010)

#### Realistic Flame Pattern

- LED technology provides a realistic flame effect

#### Long life - Minimal Maintenance

- The expected life of our LEDs is in excess of 30 years (assuming 5hrs/7days per week usage)

### Fitting Options

Spacer frames are supplied with all our standard electric fires except the Abbey and Sensation.

#### Fully Recessed

- Fire is fully recessed into standard chimney breast or false wall, without the need for spacer frame

#### Semi Recessed

- Fire is semi recessed into chimney breast
- Ideal for narrow chimneys where fire cannot be fully recessed
- Single spacer frame (45mm) is fitted behind trim

#### Flat Wall Fix

- Allows fire to be surface mounted against any flat wall
- No need for chimney breast
- Twin spacer frames (90mm) fitted behind trim

**ALSO AVAILABLE**

#### Special Deep Trim Option

See opposite page for further details

### Abbey

Shown in Black finish

Available in:

- Black finish

## Finishes

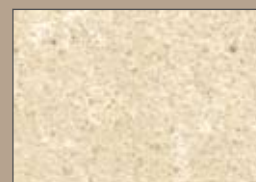

**A** Marfil micro marble \*

**B** Manila micro marble \*

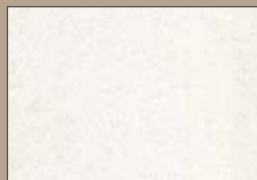

**C** Pearl Stone micro marble \*

**D** Sahara Beige micro marble \*

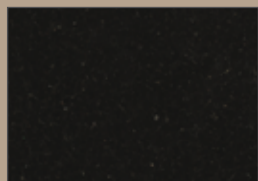

**E** White micro marble \*

**F** Natural White marble

**G** Black Granite

**H** Limestone

\* Micro marble is the opulent effect of marble captured for your home. It is made from small pieces of real marble finely crushed and bonded together.

## Caring for your Fireplace

To preserve the beauty and prolong its life, your fireplace needs regular cleaning. Due to their natural properties, Marble and Limestone require special care and attention. Both materials can stain easily and are sensitive to acids such as citrus juice, vinegar and household cleaning chemicals.

- Follow a periodic cleaning routine with a mild, neutral cleaner
- Avoid using chemical cleaners as these may damage or dull the surface
- Avoid using wax or spray polishes
- Avoid placing hot objects, drinks etc. directly onto the fireplace
- Always rinse using clean warm water

### Be Modern Marble & Stone Care Kit

Our specially designed cleaning kit is ideal for cleaning, protecting and maintaining your Marble or Limestone fireplace. It contains 3 water based solutions to:

- Clean** Light detergent gently removes any minor dirt marks
- Seal** Seals and protects the marble
- Polish** Apply polish to the surface to keep your fireplace looking its best (Use on polished surfaces only)

#### Please note:

Be Modern Limestone surrounds are supplied untreated – they are not sealed.

An appropriate sealer can be applied to a Limestone surround if required, please seek advice from your fireplace retailer. If you choose to seal your Limestone surround we would recommend that it is allowed to dry out after installation so any minor marks can be removed.

## Specialist Retailer:

Be Modern Group hold design copyright and registration of design for its product ranges. Be Modern Group are continually striving to improve and develop their range of products. It is important, therefore, to check details before ordering as sizes and specifications may change without prior notice. Whilst every effort is made to ensure accuracy and colour, it is not always possible to obtain perfect reproduction because of the materials and printing processes used and you may find that shades, natural grain markings and marble colouring are not consistent. Be Modern Group do not advise the placing of articles that are extremely hot or liable to stain on their fireplaces. There is a technical specification available; for further information please apply to the Be Modern Group.
