

**NOTHING WARMS BETTER
THAN A VARDE OVNE STOVE**

2012-2013

VARDE OVNE

We have a burning passion ...

For the people who work here, Varde Ovne is first and foremost a good workplace, where we strive to create a warm focus for homes and the families who live in them. We therefore focus on good functionality, quality materials and attractive designs. We strive continually to improve our products so that you get a stove that is easy to use on a daily basis.

Above all, we believe that a good wood-burning stove should become the focus in your home in the cold winter months. It should be an attractive addition to your home decor and so easy to use that you cannot wait to light it as soon as you get home.

We want you to be just as proud of your new Varde Ovne stove as we are.

We are passionate about our stoves.

JAN MELDGAARD
CEO
VARDE OVNE

WHAT YOU GET WITH A VARDE OVNE STOVE

Varde Ovne stoves are stylish, created to unite quality, function and Scandinavian design. With a Varde Ovne stove, your home has a warm and elegant focal point for years to come. The stove is easy to use and you get the most out of your wood fuel.

OPTIMUM FLOW

By means of air flow, the special AirBox system ensures that the stove uses outside air instead of inside air. This solution is particularly suitable for new homes and older homes where the existing insulation has been improved.

All Varde Ovne stoves are based on the convection system. Special vertical air ducts on the stoves suck in cold air at the bottom of the stove and discharges hot air at the top of the stove. The convection system promotes air circulation in the room and good utilisation of the fuel contrary to stoves without a convection system, which mainly produce radiation heat.

VARDE OVNE AND THE ENVIRONMENT

When you heat your home with wood, you are in close contact with nature. Fell a tree, and then stack the wood to allow it to dry. Bring logs indoors, light your stove and enjoy the heat that permeates the room. This is a truly valuable way of exploiting nature's gifts. This is why Varde Ovne has always been devoted to utilising our natural resources with care and respect.

All Varde Ovne stoves are carbon neutral and highly efficient. The wood absorbs just as much CO₂ while it grows in its natural environment as it emits when it is burned in a Varde Ovne stove, which means that you do not contribute to global warming when using a Varde Ovne stove.

VARDE OVNE AND THE NORDIC ECOLABEL

Varde Ovne was the first manufacturer of wood-burning stoves in the world to meet the strict requirements to the much coveted Nordic Ecolabel. The standard has stringent requirements for combustion efficiency and particle and hydrocarbon emissions. To qualify to carry the Nordic Ecolabel a stove must not contain any heavy metals.

**OUR WEBSITE IS CARBON NEUTRAL.
TAKE A LOOK AT UK.VARDEOVNE.DK**

It has to be a Varde Ovne stove

Varde Ovne has been producing wood-burning stoves for a very long time, since the days when wood-burning stoves were mostly used in holiday homes. We have been one of the leading players in developing new, high-efficiency stoves that are now a natural focal point in any home.

This means that there is now a Varde Ovne stove in a great many homes, not only in Denmark, but also in Southern Europe and the other Scandinavian countries. Varde Ovne is widely recognised for making stoves that provide the full benefit of the work we put into turning trees into logs ready for burning.

Of course, it has to be a Varde Ovne stove ... but which one? We have developed a wide range of freestanding and wall-mounted wood-burning stoves. Most of our stoves are available in different design variations.

MODEL VARDE AURA

Quality details in an attractive design

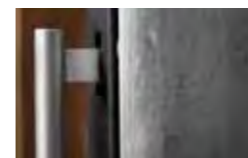

The Aura range features high-quality cast iron doors, top plate, grate, base and flue. Fitting options are flexible, as the flue can be fitted either to the top or the back of the stove.

Large capacity ash pan.

Based on the convection principle – air is sucked in through the air ducts.

Handles are cool to the touch.

The cast iron shaking grate makes it easy to empty the Aura.

MODEL VARDE AURA AURA 1

Aura 1 has a large chamber with ample fuel storage space. The door opens when pressed gently.

AURA 1 STEEL VARIANTS: BLACK

CONVECTION

Height: 100 cm
Width: 50 cm
Depth: 42 cm
Weight: 104 kg

Accessories: soapstone top

MODEL VARDE AURA AURA 11 + 12

Aura 11 has an elegant plinth for a light and airy look.

Aura 12 is the wall-mounted model in the Aura range. You can mount this stove on the wall at an ergonomically correct height. The stove takes up no floor space and allows you to make an elegant and harmonious design statement.

AURA 11 + 12 VARIANTS: BLACK

Height: 110 cm
Width: 50 cm
Depth: 42 cm
Weight: 113 kg

Height: 76 cm
Width: 50 cm
Depth: 42 cm
Weight: 101 kg

Aura 12

MODEL VARDE AURA AURA 2

Aura 2 is designed with a wider front, providing more space in the chamber under the stove and an excellent view of the flames. The combustion chamber door opens when pressed gently.

AURA 2 VARIANTS: BLACK

Height: 100 cm
Width: 50 cm
Depth: 43 cm
Weight: 101 kg

MODEL VARDE AURA AURA 3

Only 87 cm high, Aura 3 is the smallest stove in the Aura range. It is perfect for smaller rooms, where it becomes the natural centre of attention.

AURA 3 STEEL VARIANTS: BLACK

Height: 87 cm
Width: 48 cm
Depth: 43 cm
Weight: 106 kg

MODEL VARDE AURA AURA 3 SOAPSTONE

Choose Aura 3 with soapstone if you want to enjoy long-lasting heat from your stove. The timeless grey soapstone facing retains and radiates heat long after you have stopped burning firewood. Aura 3 soapstone is only available with top exit.

AURA 3 SOAPSTONE VARIANTS: BLACK AND GREY

Height: 87 cm
Width: 48 cm
Depth: 43 cm
Weight: 190 kg

MODEL VARDE FUEGO

Spanish inspiration – Danish quality

Fuego is a new range of stoves from Varde Ovne with plenty of inspiration from Spain: flames, fiery flamenco, glowing volcanoes and a sleek, harmonious design. With the new Fuego stoves, Varde Ovne has created a range that is based on the classical wood stove and has all the accessories that make the stoves the heart of the home.

The stoves are modern but with classical features that create a unique focal point in the home. The Fuego door is a conspicuous and characteristic design feature. It makes the Fuego unique, both functionally and aesthetically.

The Fuego range was created by engineer and industrial designer Aske Korsgaard Hejlesen.

MODEL VARDE FUEGO FUEGO 1

The new design and the characteristic lines of the stove make Fuego 1 an attractive stove, combining the best of the classical wood-burning stove with a new functional design. The efficient combustion chamber quickly heats the room and is an important component in this modern stove.

FUEGO 1 VARIANTS: BLACK

The cast iron shaking grate makes it easy to empty the Fuego.

Based on the convection principle – air is sucked in through the air ducts.

Handles are cool to the touch.

MODEL VARDE FUEGO FUEGO 2

Designed as a Fuego 1, but lower. Fuego 2 is a functional and aesthetically attractive stove that emphasises the style of the home.

FUEGO 2 VARIANTS: BLACK

MODEL VARDE FUEGO FUEGO 1 SOAPSTONE

The soapstone on Fuego 1 is an important part of the construction and mode of operation. Fuego 1 is a good choice if the wood-burning stove is the primary source of heating, for example in rooms that need to stay warm overnight. The heat is retained in the soapstone and released long after the fire has gone out.

FUEGO 1 VARIANTS: GREY

Height:	99 cm
Width:	50 cm
Depth:	41 cm
Weight:	140 kg

MODEL VARDE SHAPE

Handles are cool to the touch.

Ergonomically correct adjustment of the air vent.

Combustion chamber designed to make it easy to light and clean the stove.

Door, top plate, grate and flue made of high-quality cast iron.

A stove in good shape

As the name indicates, Shape is a slimline stove. The tall and slender stove takes up very little space, whether located in a corner or along a wall. Fitting options are flexible, as the flue can be fitted either to the top or the back of the stove. Available with AirBox system.

Accessories: soapstone top

MODEL VARDE SHAPE SHAPE 1

Shape 1 is a tall, slender version; total height 112 cm.

Shape 1 with soapstone is the ideal choice if you want to enjoy long-lasting heat. The elegant grey soapstone facing retains and radiates heat long after your fire has gone out.

SHAPE 1 STEEL VARIANTS: BLACK AND GREY

SHAPE 1 SOAPSTONE VARIANTS: BLACK AND GREY

Steel	
Height:	112 cm
Width:	52 cm
Depth:	41 cm
Weight:	120 kg

Soapstone	
Height:	112 cm
Width:	52 cm
Depth:	41 cm
Weight:	195 kg

MODEL VARDE SHAPE SHAPE 2

Shape 2 is a smaller version of Shape 1.

SHAPE 2 STEEL VARIANTS: BLACK AND GREY

SHAPE 2 SOAPSTONE VARIANTS: BLACK AND GREY

Steel	
Height:	102 cm
Width:	52 cm
Depth:	41 cm
Weight:	115 kg

Soapstone	
Height:	102 cm
Width:	52 cm
Depth:	41 cm
Weight:	181 kg

MODEL VARDE VIVA

More fire for your money

The 180 degree panoramic glass door on the Viva stove gives you a good view of the cosy fire and lends a soft, warm glow to your room, and the large door makes the combustion chamber easy to light and clean.

Handles are cool to the touch.

The cast iron shaking grate makes it easy to empty the Viva.

Large capacity ash pan.

Room with door for fuel storage.

**FOR MORE INFORMATION ABOUT THE
LARGE VIVA RANGE AND ACCESSORIES
GO TO UK.VARDEOVNE.DK**

MODEL VARDE VIVA VIVA 21 STEEL

The base of Viva 21 has a practical fuel storage space. The design is elegant and harmonious. It is easy to place against a long wall, in a corner or in the middle of a room.

VIVA 21 VARIANTS: BLACK AND GREY

MODEL VARDE VIVA VIVA 21 SOAPSTONE

Choose Viva 21 with soapstone if you want to enjoy long-lasting heat from your stove. The elegant grey soapstone facing retains and radiates heat long after your fire has gone out.

VIVA 21 VARIANTS: GREY

MODEL VARDE VIVA VIVA 31

Viva 31 makes it possible to enjoy the heat for longer. The heat-retentive stones (accessory) in the extended top section of the Viva 31 stove remain hot long after the fire has gone out.

VIVA 31 VARIANTS: BLACK AND GREY

VARDE OVNE HEAT RETENTION

The charm of a good wood-burning stove is the live flames and the cosy heating it provides. It is the joy of a stack of wood for a long winter full of cosy times indoors. And it is the inconvenience that the stoves only provide heating when lit. Varde Ovne has a number of different solutions for retaining heat long after the fire has gone out. Examples include soapstone cladding and built-in heat-retentive stones as in the Varde Viva 31.

The heat-retentive stones in the extended top section of Viva 31 radiate heat long after the fire has gone out.

VARDE OVNE STONE

Varde Ovne chooses the best stone for its different solutions. As an example, Varde Ovne uses soapstone as external cladding. In addition to retaining heat, the soapstone also provides an attractive and exclusive design statement. Another option is to fit heat-retentive stones to the Viva 31. On account of the weight (90 kg), the stones are only fitted once the stove is in its final position.

MODEL VARDE THURØ

MODEL VARDE THURØ THURØ 10

Thurø 10 is a classical wood-burning stove. It is low, compact and has an extra-wide combustion chamber. Thurø is designed to embody the primary function of a traditional wood-burning stove: to provide a focal point where the family can gather to warm themselves.

THURØ 10 VARIANTS: BLACK

Height: 96 cm
Width: 55 cm
Depth: 41 cm
Weight: 121 kg

MODEL VARDE THURØ THURØ 11

Thurø 11 is a classical wood-burning stove in a new, modern design. The extra-wide combustion chamber creates good heating and a warm and cosy atmosphere.

THURØ 11 VARIANTS: BLACK

Height: 94 cm
Width: 55 cm
Depth: 42 cm
Weight: 101 kg

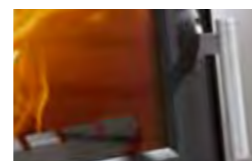

Large ash pan.

The convection system ensures good heat distribution.

Classical damper.

Handles are cool to the touch.

MODEL VARDE FARSEØ 1 SPECIAL

Farsø is one of the most popular Varde Ovne stoves for use in holiday homes. A classical wood-burning stove to suit any room.

FARSØ 1 SPECIAL VARIANTS: BLACK

CONVECTION

Height:	87 cm
Width:	42 cm
Depth:	37 cm
Weight:	73 kg

FLOOR PLATE

Today, the floor plate is more than just a safety feature. It is also an essential part of the overall finish of a wood-burning stove. Varde Ovne offers floor plates in steel and glass.

If the wood-burning stove is placed on a flammable floor, the non-flammable floor plate must be large enough to comply with minimum distance requirements.

STEEL

GLASS

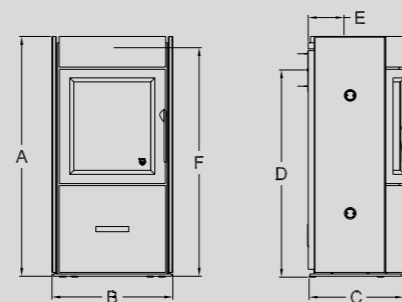

Find the answers on uk.vardeovne.dk

Find the answer to all your burning questions on uk.vardeovne.dk. Here you can see the entire range and get assistance to make the right choice. If you prefer to design your own solution, the website has a chimney calculator to help you choose the right chimney for your wood-burning stove.

On uk.vardeovne.dk you can also find hints about where and how you install your wood-burning stove. Once you have installed your chosen stove, you can also find tips about wood, kindling and how to light the stove. In this way you get the most out of your new Varde Ovne stove.
