

CAST A WARM EYE ON LIFE

In choosing a multi-fuel stove many factors influence the decision. Some people buy to reduce their heating bill. Some for the comforting warmth that a stove brings to a home. Others seek elegance, or performance. And increasingly, many buy for environmental reasons,

to reduce emissions or because cast iron is a recycled material. Whatever the primary reason, everyone seeks quality and value, and the deserved feeling of having made a wise purchase decision that is going to provide satisfaction over a lifetime of warmth.

STOKER

Multi Fuel Insert Convection and Radiant Stove

The unique design of the Mulberry **STOKER** can deliver 6.5kW of heat throughout the room because a convection stream distributes heat much more widely than radiant heat alone can achieve. It's a stove Dracula himself would have appreciated as everyone in the house will have warm blood! Taking up a very small space on the hearth with minimal intrusion into the room, the **STOKER** is ideal for the modern home.

FEATURES

- Fits into standard fireplace without removing fireback
- Improves your house Energy Rating (BER)
- Burns Wood, Coal, Anthracite, Peat Briquettes, Turf
- Maximum output 6.5kW
- Maximum fuel consumption 0.93kg per hour
- Efficiency of 76%
- More than twice as efficient as an open fire - halves your fuel bill
- Clean burning with low emissions - 0.26% CO (at 13% O₂)
- Long lasting Hi-Chrome castings in grate and firebox
- Unique bay window gives wide view of fire
- Window air wash for clean glass
- Controlled burn rate – 0.5kW to 6.5kW per hour
- Provides both Convection and Radiant heat
- Will burn overnight
- Easily installed – DIY fitting in 15 minutes
- Works perfectly in normal chimney
- Can be used with or without flexible flue liner
- Guaranteed Irish – manufactured in Ireland
- Certified to EN13229:2001 and CE approved
- Manufactured by company certified to ISO 9001 and ISO 14001
- Backed by Mulberry CUSTOMER CARE

Secondary air and air wash intake

Outlet slots for convection heat on top of Insert

Spin Valve controls primary combustion air supply, with intake slot for convection heating

Genuine Mulberry. The Stoker is a Registered Design

MULBERRY STOVES - QUALITY AND VALUE

At Mulberry we have assembled a team of dedicated and experienced people who are determined to provide products that represent exceptional quality and value. In every respect our products are designed and manufactured to deliver on this promise, and the team at Mulberry will consistently go the extra mile to ensure complete customer satisfaction.

Mulberry products are designed in our factory on the banks of the river Suir, where stoves have been made for generations. Before a stove leaves our factory in Carrick on Suir, we carry out a 28 point quality check before it is shipped to our dealers. This work is done by people who have been making stoves for thirty years. The Mulberry

Quality System is certified to ISO 9001, and we are also certified to ISO 14001 Environmental Standard. Mulberry Stoves are CE approved and meet DIN EN 13240 standards.

You can relax in the knowledge that our Customer Support group is charged with implementing our commitment to make owning a Mulberry a pleasurable and satisfying experience.

Our small team has over 100 years of combined experience in making stoves and we are dedicated to Mulberry becoming synonymous with **quality** and **value**. Our growth in recent years is testimony to the fact that this is what our customers appreciate. So, join the growing band of satisfied Mulberry owners.

Joyce

Clear Glass with Window Air Wash provides a highly controllable and efficient flame pattern. Boiler version also available that provides hot water and heats 2 radiators.

Be warm and cosy with this hot little number. Elegance and efficiency combined in a low priced package. The Mulberry JOYCE is the ideal multi-fuel stove for the TV or Family room.

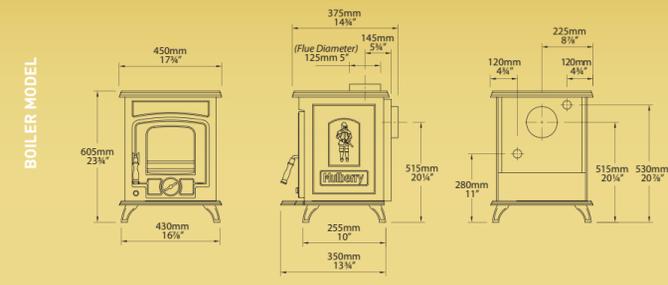

JOYCE

Cast Iron multi fuel stove with overnight burning facility. Clear glass with window air wash system. The boiler model features a thermostat controlling the high output boiler that can heat up to 12 radiators.

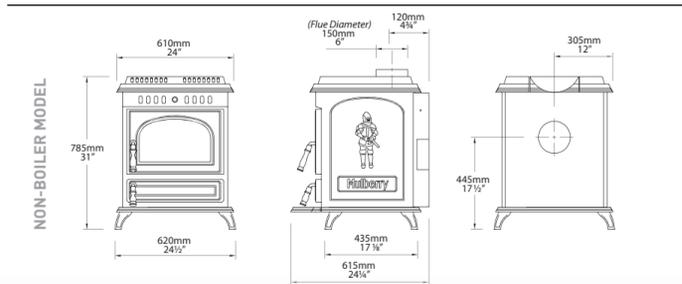

A masterpiece of a stove – precise control with a thermostat ensuring that the stove burns at the rate **you** want. The comfort of knowing that you have made a purchase that will save its cost in a couple of winters. The satisfaction of contributing to reduced emissions. Classic lines that can only be achieved in cast iron, and the timeless elegance of a quality product. Look forward to years of warmth and pleasure from this Irish designed stove.

BECKETT

Yeats

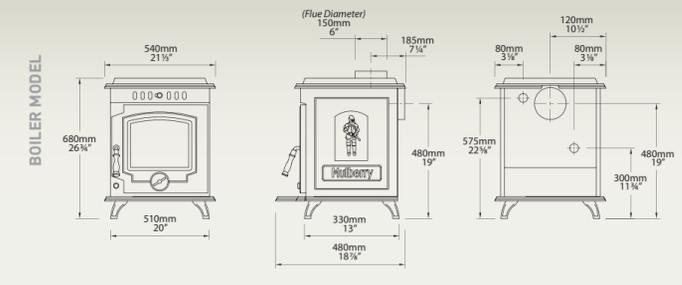

Cast Iron multi fuel stove with window air wash system. The Mulberry YEATS can be banked down for the night to provide a warm room on those chilly winter mornings. The boiler model will also heat up to 6 radiators.

As elegant as the poetry of its namesake – control, safety, economy, beauty, and ecological efficiency. A high output stove that has a large view of the fire through a clear glass door. So fuel efficient that the cost of the stove will be recovered in a couple of winters.

Cast a "warm" eye on life with this beautiful Irish designed stove.

YEATS

ENAMEL OR MATT BLACK

	Non Boiler Model	Boiler Model
Maximum Output	10.6kW	11.9kW (7.8kW to water, 4.1kW to room)
Nominal Output	8.9kW	9.8kW (6.6kW to water, 3.2kW to room)
Suitable Fuels	Wood, Coal, Turf, Anthracite, Eco-logs	Wood, Coal, Turf, Anthracite, Eco-logs

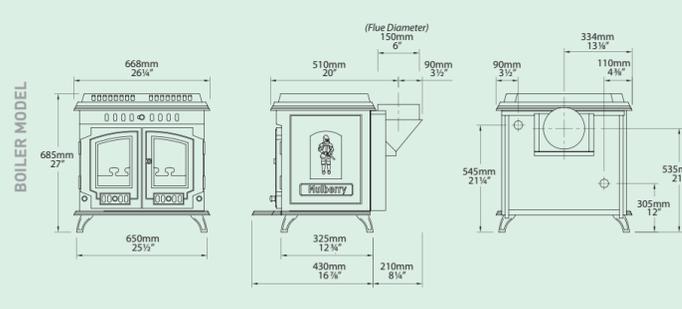

A double door, cast Iron multi fuel stove with window air wash for clear glass. Spark guard for safe operation with stove doors open. Graduated machined hotplate. Stove can be set for overnight burning. Boiler model will also heat 8 radiators.

As Oscar Wilde said, "my tastes are simple, I simply want the best." The Mulberry **WILDE** is the best choice if you want a versatile high output stove. Be snug and warm while being ecologically responsible through reducing harmful emissions.

An Irish designed stove that delivers quality and value.
